- **the Workplace (Health, Safety and Welfare) Regulations 1992**
- **the Provision and Use of Work Equipment Regulations 1998**

Approved Member of SELECT (The Electrical Contractors Association of Scotland)
Where we have verification that our work complies with current electrical regulations.

Stirling Electrical Services Ltd.
Registered in Scotland (No 216819)
Registered Office: 12 Queen Street, Fallin, Stirlingshire, FK7 7JG
VAT Registration Number: 809 3702 29

Stirling Electrical Services Ltd.

Stirling Electrical Services Ltd. have carried out the inspection and testing of all electrical appliances contained within this register. We have found at the date of test on the attached Register, that all records for individual appliances are correct and have been tested using the latest computer testing equipment to the standards recommended for the safe use of portable appliances.

Stirling Electrical Services Ltd. ask that this register be kept in a safe place as a record of the client taking steps to comply with Regulations listed on the front page of this report

The inspection and test record for each appliance tested is what we have found on the date specified on the attached records for each appliance and note should be recorded by the client of the next retest date.

As the attached record for each appliance is what we have found on the date of test, it is the clients responsibility to uphold the inspection and maintenance on any of the appliances from after the date and time the inspection and test was carried out by ourselves. The client should put in place a reporting system in order that they are notified by their employees of any defects or problems found with appliances throughout the period between Portable Appliance Inspection and Tests. The client should then decide what steps to take to make sure the appliances are maintained in a good safe working order.

The client should also take note of any appliances that have Failed the Inspection and Test contained in the attached register and remove the appliances from the working premises or remove the appliances until repairs have been carried out. Another Inspection and Tests should be carried out on repaired appliances.

Additional and up-to-date reports will be available after future tests.

It would be helpful for future tests if a separate note was kept by the client of any appliance location or details change. If appliances are no longer in use please take note of this as well but please DO NOT DELETE the record off the register as appliance details must be kept.

Your equipment should be tested in accordance with the retests date set out in the attached records to maintain the safety standards of the appliance and to detect faults EARLY.

A reminder will be sent out to you by *Stirling Electrical Services Ltd.* close to this date but we remind our clients that it is the clients responsibility to make sure appliances are maintained in a good safe working order and our clients should make sure their appliances are retested before the next retest date.

**YOUR APPLIANCES WERE
INSPECTED & TESTED ON***

21st August 2024

YOUR NEXT TEST IS DUE BEFORE*

21st August 2025

*It is the clients responsibility to make sure appliances are maintained in good safe working order as Stirling Electrical Services Ltd. can only report on the inspection and test details we have found on our date of inspection and test and cannot be held responsible for subsequent mis-use of appliances or subsequent faults on appliances.

For more details of the information contained in this report or for other details then please do not hesitate to contact
